FAQ's

What is a Hugger Belt Conveyor?

- ***A hugger belt conveyor is a type of conveyor belt specifically designed to provide secure handling of products. Unlike traditional conveyors with a flat surface, hugger conveyors utilize belts that grip the sides of products, offering several advantages:***
- ***Stability: Hugger belts prevent products from tipping or falling over, ideal for unstable items or uneven surfaces.***
- ***Bottom Coding: The secure hold allows for easy access to the bottom of products for tasks like date or lot coding.***
- ***Transfer Applications: Hugger conveyors excel at transferring products between conveyors without tipping or damage.***
